## Inventory Management Workbook User Guide

This workbook is designed to help you with basic inventory management tasks including recording stock value, physical inventory counts, sales, and purchase records. It also lets you prepare a purchase order form, generate low stock reports, and inventory movement within specific date ranges. Sample data is included

To use these templates yourself, click above on File>Make a Copy. This will let you copy this template to your Google Drive and you can edit or use any way you wish.

Get Started:
Step 1: Prefill the inventory list tab with your products' basic information
Step 2: Create your supplier contact list
Step 3: Update your purchase and sales records
Step 4: Start your physical inventory count to complete the inventory list records

## *Note that all shaded columns are automatically computed

## Inventory List Tab

Enter product details including supplier name, product size and color
Add your product code or SKU
Assign a reorder point, cost price and markup
Record physical inventory on display and in your stock room to arrive at your initial stock level

## Supplier Contact List

Enter your supplier name and contact details

## Purchase Record Tab

Enter your purchase order number
Choose your product name from the drop down list
Indicate the quantity received in cases and singles
Add the date of your purchase order and record the arrival date *only* when the stock arrives
Use the floating tab to filter purchase records based on your chosen date range

## Sales Record Tab

Enter your sales order number
Choose the product name from the dropdown list and indicate the quantity of items sold Indicate your customer's name and the date of sale
Add the ship date *only* when the items have already been sent out for delivery
Use the floating tab to filter sales records based on your chosen date range

## Low Stock Report Tab

All the data in this tab is autogenerated
Click on the funnel icon in F3 (Stock Level Status) to filter only products with "Reorder" status
Click on the funnel icon in A3 (Supplier Name) to sort the list alphabetically
Refresh the list by repeating steps 2 and 3 before running a report

## Inventory Management Workbook User Guide

This workbook is designed to help you with basic inventory management tasks including recording stock value, physical inventory counts, sales, and purchase records. It also lets you prepare a purchase order form, generate low stock reports, and inventory movement within specific date ranges. Sample data is included.

To use these templates yourself, click above on File>Make a Copy. This will let you copy this template to your Google Drive and you can edit or use any way you wish

Get Started:
Step 1: Prefill the inventory list tab with your products' basic information
Step 2: Create your supplier contact list
Step 3: Update your purchase and sales records
Step 4: Start your physical inventory count to complete the inventory list records

## *Note that all shaded columns are automatically computed

## Purchase Order Template

Choose your supplier's name from the drop down list and the contact information will be automatically populated based on your list of suppliers
Choose the product to be ordered from the drop down list, add your supplier's item reference number and the cost price will be automatically populated based on your inventory list Note that all the products you sell will be shown in the dropdown to allow you to order these items from a different supplier in case of a better unit cost
Specify any agreed upon wholesale discounts (usually in \%), or total special discounts on one or more items (usually in \$)

## Shrinkage and Turnover Calculator Tab

Use this tab to calculate for inventory shrinkage rate and inventory turnover ratio
Shrinkage calculator: Key in the value of your inventory in books and the calculator will pick up the value of your physical inventory based on the physical count from your inventory list tab.
Turnover calculator: You will need to key in all the figures from your accounting records

Inventory Shrinkage: Definition, Causes \& How to Prevent It Inventory Aging Report and How to Calculate: The Ultimate Guide What is Cost of Goods Sold (COGS) \& How To Calculate It

\section*{Inventory Management and Performance Calculators}
** Just key in the value of your inventory in books
\begin{tabular}{|r||ll||}
\hline \multicolumn{3}{|c|}{ Inventory Shrinkage Rate Calculator } \\
\hline \hline Value of Inventory in Books: & \(\$\) & \(12,285.00\) \\
\hline \hline Value of Inventory from Physical Count: & \(\$\) & \(11,860.85\) \\
\hline \hline Inventory Shrinkage Rate: & \\
\hline
\end{tabular}

\footnotetext{
** Your inventory shrinkage rate tells you just how much inventory you've lost to various reasons (theft, fraud, errors, and damage). The goal is to make sure that this rate is kept low as it indicates the extent of your loss in investment and potential profit.
}
\begin{tabular}{|r||ll||}
\hline \multicolumn{3}{|c|}{ Inventory Turnover Ratio Calculator } \\
\hline \hline Total COGS in your Income Statement: & \(\$\) & \(7,624.85\) \\
\hline \hline Beg. Inventory, Month X: & \(\$\) & \(12,285.00\) \\
\hline \hline End Inventory, Month X: & \(\$\) & \(9,751.85\) \\
\hline \hline Inventory Turnover Ratio: & \\
\hline \hline
\end{tabular}
** Your inventory turnover ratio tells you how efficiently you have been converting inventory into sales for a specific period. Use this ratio in evaluating and coming up with marketing and pricing strategies, as well as purchasing decisions.```
